

# WE'VE GOT YOU COVERED

ANTIMICROBIAL  
PROTECTED FILM

You can't see germs,  
but you can see clean.

## INTRODUCING SILVER DEFENDER. A CLEAN YOU CAN SEE.

Silver Defender is a self-cleaning Antimicrobial Protected Film that is built for high touch, high traffic areas. These Antimicrobial Protected Films are waterproof, resistant to most cleaning products, and can be applied to surfaces across industries.

Silver Defender Antimicrobial Protected Films are developed for a variety of industries, including transport, education, business and retail.

TRANSPORT

EDUCATION

BUSINESS

RETAIL

## WHAT MAKES SILVER DEFENDER SO EFFECTIVE?

### The science of silver.

Our films are imbedded with silver ions that provide a cleaning power that is activated by light, air pressure and touch.

Silver Defender products have built in antimicrobial protection to guard against degradation from microorganisms, bacteria, mold, mildew and fungi to ensure the product is clean and only need to be replaced every 90 days.

## Silver Defender offers antimicrobial protection across a wide variety of industries, applications and sizes, including:

### 2" FILM

For use on push bars, elevator buttons, bathroom handles, toilet handles, water fountains, etc.

### 4" FILM

For use on push/pull flat handles, handicap push plates, sink handles, mail cart handles, refrigerator door handles, etc.

### 7" FILM

For use on railings, stairway handles, paddle handles, garbage bins, etc.

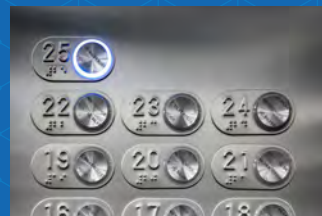

### DIE CUT DESIGNS

### TOUCHSCREEN FILM

### ELEVATOR BUTTON FILM

### PROTECTED MASKS

Allergen FREE
