

Accessory:

Haiku Fan Drop Ceiling Mount

TECHNICAL SPECIFICATIONS

There's a Haiku fan for every space — even those with drop ceilings. A new drop mount safely attaches Haiku fans to drop ceilings without vibration, wobbles or rattles.

This mount ensures that the weight of the fan is carried by the building structure, not the gridwork of the ceiling. The electrical box can be positioned anywhere along the grid to suit the needs of your particular space. The mount fits 2x2 ft and 2x4 ft ceiling tile grids.

The drop ceiling mount is suitable for fans up to 50 lbs, so all sizes of Haiku fans — including 52, 60, and 84 inch diameter fans — are compatible, as long as the fan's airfoils hang at least 7 ft above the floor.

So never fear — whether you've got an office, a classroom, or any other space with a drop ceiling, there's a Haiku fan mount for your space, too.

Drop Ceiling Mounts at a Glance
