

## Leading Innovation in UV-C Infection Prevention

Surfacide® provides an evidence-based, automated UV-C decontamination technology that data indicate is effective against multi-drug resistant organisms including C.diff, MRSA, VRE, CRE and Acinetobacter. The Surfacide Helios system incorporates multiple emitters that disinfect\* healthcare environments in a single cycle - including the bathroom.

### 1 Shadows Matter

Data show UV-C is less effective on surfaces in shadowed areas. Surfacide's multiple emitters operating together significantly reduce shadows and deliver energy more effectively versus first generation UV robots.

### 2 Greater Coverage

Distance is critical to UV-C efficacy. As the distance increases, less energy is delivered to surfaces. Surfacide positions multiple emitters closer to high-touch surfaces, delivering more energy throughout the room in a single cycle.

### 3 Decreasing Time & Labor

Single emitter systems should require frequent repositioning and extended run times. Surfacide's automated system provides shorter cycle times and increased staff productivity without repositioning.

\*The reduction of pathogenic bioburden.

# ONE IS NOT ENOUGH

### Why Surfacide?

#### Create a healthier environment

Join more than 350 leading hospitals around the world that have completed 1 million+ Surfacide cycles.

#### Unparalleled Innovation

Leading the UVC market with comprehensive advancements providing you with the power to do more.

#### Meaningful Design

Easy-to-use technology purposefully engineered from top to bottom for unmatched performance and mobility.

#### Flexibility

Emitters operate individually or in multiples according to the size of the space. Unique "Scrub" mode targets defined areas unable to be addressed by single emitters.

#### SURFcare

Hassle-free support including over-the-air software updates, accessory and equipment exchanges, and cloud-based portal for peace of mind.

#### SURFcloud

Real-time data archive provides actionable reports to drive outcomes and utilization.

#### Training and Support

Multidisciplinary team of experts focused on the goals necessary to achieve your success. Onsite and virtual ongoing training provided.

#### Cost Advantages

Greatest value in UV disinfection including 3 UV-C emitters, control tablet and multiple safety sensors all priced similar to most single emitter systems.

#### Multilingual

Surfacide support personnel, tablet app and manual are all available in multiple languages.
