

# PROVIDE PEACE OF MIND IN AN UNPREDICTABLE TIME

The world's focus has turned to effective infection prevention and thorough decontamination – and Surfacide is ready to answer that call.

Surfacide's Helios<sup>®</sup> System uses multiple UV-C light towers simultaneously to rapidly inactivate and prevent the spread of dangerous microorganisms including Coronavirus, C.diff, MRSA, VRE, CRE and Acinetobacter.

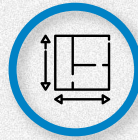

# Hello Helios<sup>®</sup>

## KEY BENEFITS OF THE SURFACIDE SOLUTION:

### EFFICIENCY

- Three emitters in a single cycle reduce shadows and deliver more energy in less time
- No other solution offers this level of efficiency

### FLEXIBILITY

- Emitters can be decoupled for use independently or in a dual configuration
- Allows for use in small areas, such as patient bathrooms

### AUTOMATION

- Laser mapping technology automatically calculates the appropriate cycle time for each space
- Peace of mind that the system is working optimally

**FIRST-GENERATION UV SYSTEMS FELL SHORT, REQUIRING  
MULTIPLE PLACEMENTS AND MISSING KEY AREAS.**

**500 HOSPITALS TRUST SURFACIDE.**

## SURFACIDE TAKES A DIFFERENT APPROACH

- Shorter cycle times
- Decreased labor/operating costs
- Minimal impact to throughput
- More energy delivery
- Better results

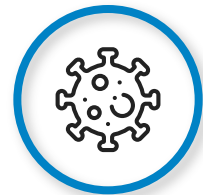

Surfacide is offering a path toward elevated, safer patient experiences, even in the face of growing infection concerns.
