

MARATHON UPRIGHT EXTRACTOR

Power, efficiency, mobility and value

MARATHON 2-200

Model# 98252H

Tornado's® Marathon Upright Extractors are designed for daily, interim or deep restoration cleaning.

Constructed of durable rotationally molded polyethylene, these units reflect Tornado's® commitment to design standards that will endure the rigors of daily usage. Because of their compact vertical design, ease of storage, mobility and operation, Tornado® Marathon Upright Extractors are well-suited for use by in-house cleaning crews, carpet technicians, contractors, schools, hotels, and restaurants. They are lightweight with a low-center-of-gravity and include user-friendly, waist-high control switches to accommodate operators of all sizes.

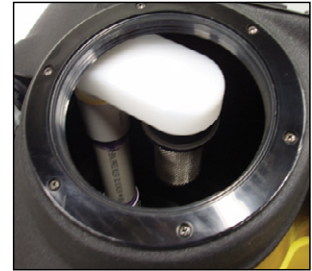

The Marathon Extractors units are designed with 13 gallon solution and 11 gallon recovery tanks and twin, 2-stage 1.6 hp vacuum motors that generate up to 150" of static waterlift, delivering faster dry-times and a safer, drier indoor environment. Tornado's® innovative design features a hinged, clam shell design that allows easy access to the pump for simple maintenance and increased machine up-time.

PRODUCT SPECIFICATIONS	
Model	MARATHON 2-200
Catalog Number	98252H
MACHINE DIMENSIONS	
L X W X H	34.5" x 22" x 45"
Net Weight	108 Lbs.
Solution Tank	13 gallon
Recovery Tank	11 gallon
Cord	Pig Tail
DESIGN CHARACTERISTICS	
Body Construction	Polyethylene
Sol. / Vac. Hose	1.5" x 20' Hose
Wheel Dimensions	8" non-scurr soft rear / 3" swivel casters
Transport Handle	Standard
Dump System	Hose on back of unit
Corrosion Proof Components	* MEK type front and rear wheel *PE material
CLEANING SYSTEM	
Vacuum Head Type	Sound insulated
CFM	97
Water Lift	150"
PSI	50-200
MOTORS	
Motor Type	Dual 2-stage 1.6 HP
Sound Level	82 dB
OPTIONAL ACCESSORIES	
12" Professional Drag Wand for 101 PSI or more	98398
20' Vac Hose	1504WDSI
Standard Utility Hand Tool	98340
Crevice Detailer Extraction Tool	98342
Upholstery Hand Tool	98343
Utility Stair Tool	98344
Utility Stair Tool	98344
Standard Metal Hand Tool	98350
Power Cord	M1374

EASE OF USE

The control panel and hose hook-ups are conveniently located at the top of each model. All switches are fitted with molded vinyl covers to protect them from moisture.

SMART DESIGN

The recovery and solution tanks are both accessed at the top of the units and feature large openings for ease of fill and rinsing. The recovery tank features a float that cuts off suction when the tank reaches capacity to protect the vac motors. The large center-pull drain valve is located at the rear of the unit, which allows rapid removal of soiled solution into a floor drain or bucket.

EASY TO TRANSPORT

The dolly-type design makes transporting a breeze. With large non-marking rubberized wheels and durable front-mounted swivel casters, the units can be easily transported from one job to another or taken up a flight of stairs.

SIMPLE ACCESS TO PUMP AND HEATER

For fast and easy maintenance and increased machine up-time, the clam shell design allows quick access to the pump and heater
