

Protexus Handheld Sprayer

Quick Start Guide

For full instructions, refer to Operation Manual included with product.

1. Insert battery into charger and plug into wall socket to charge.

2. Rotate tank lock (A) to "unlock". Then, pull ring (B) to remove tank.

3. Fill tank with desired liquid*. Make sure electrostatic switch (D) is "OFF".
**Refer to PURTABS info for dilution.*

4. Insert tank straight up into sprayer until you hear a click. Then, rotate tank lock (A) to "lock".

5. Insert charged battery (C) into sprayer.

6. Turn electrostatic switch (D) to "ON". Push trigger lock (E) to "UNLOCK".

7. Pull trigger and spray on desired surface. Use smooth back and forth motions to spray 2–3 feet from surface.

8. When finished, turn electrostatic switch (D) to "OFF"
